

Vent Hood Magic

Vent Hood Magic foaming exhaust hood cleaner is a specially designed surfactant blend made from natural plant derived materials. *Vent Hood Magic's* foaming formula is designed to coat commercial exhaust hoods and flues with eco-friendly grease removing foam. It removes fats, oils, grease and other organic buildup.

Vent Hood Magic was designed for use with an automatic mist/spray system as part of your daily routine maintenance program. It can also be used to spray the exhaust fan on the roof and will not corrode the roof membrane.

Advantages

Reduces:

- Excessive manual cleaning
- Fire causing grease buildup
- Corrosion
- Foul odors
- Environmentally friendly
- Not caustic or corrosive
- Low cost
- No need to shut down line when using with an automatic mist system
- Safe for metals, stainless steel, pvc and drain lines

Available in:
1 gallon bottles or 55 gallon drums.

Vent Hood Magic foam is safe for metals, stainless steel, pvc, and drain lines. It does not contain VOC's, phosphates, free enzymes or caustic/corrosive chemicals. It is a specially designed surfactant blend made from natural plant derived materials that are 100% biodegradable making it safe for the environment.

Vent Hood Magic is designed for use in conjunction with BioStim's other microbial drain line maintenance formulas. It will not harm, in any way, the organisms in our microbial formulas that keep your drain lines free of grease. When used in conjunction with BioStim's Food Service drain line products, the grease released into your drain lines will be digested and converted to carbon dioxide and water.
